Jacob Harper

OVERVIEW

I am a freelance web developer and business leader in Atlanta, Georgia. I build small and large full-stack applications using frameworks such as REACT and NODE. My track record as programmer comes from my clients and from projects I've worked on with the 100DEVS agency. I am looking for a larger company to expand my outreach in my community. Building user-friendly websites in my community has allowed me to help businesses establish a connection with their customers.

WORK EXPERIENCE

Starbucks Coffee Company —— *Barista/Shift Supervisor*
Auburn/Opelika, Alabama —— November 2018-Present

Freelance Software Engineer —— *Web Development*
Auburn/Opelika, Alabama —— November 2021-Present

100DEVS—— *Web Development*
Los Angeles, California —— November 2021-Present

PROJECTS AND ACHIEVEMENTS

Future Business Leaders of America —— *Publication Design*
Birmingham, Alabama —— May 2017
I was responsible for teaching different design skills in Adobe Photoshop® to a group of my peers and we presented our work in front of a judging panel. The project we presented at the FBLA conference won 2nd place in the state.

Restaurant – *Web Design*
Auburn, Alabama —— February 2022
I built a website for a small restaurant in Auburn, Alabama. This experience allowed me to get one on one experiencing working with clients and collaborating to help design a product that was beneficial for the growth of their business.

KitchenAnywhere – *Full Stack Web Project*
Atlanta, Georgia —— April 2022
This is a project I founded and started to push my back-end and front-end programming skills simultaneously. The Project Focused on creating a simple kitchen inventory solution for all people by using the Kroger API and quickly became a passion project.

EDUCATION

Southern Union State Community College
Opelika, Alabama —— August 2018-March 2020

Arizona State University —— *Bachelor's Degree in Organizational Leadership*
Online—— Fall 2024
